

100th Monkey

A CIRCUS FREAKS™ DAPP PRODUCTION
WHITEPAPER 2.0

The hundredth monkey effect

The hundredth monkey effect is a hypothetical phenomenon in which a new behavior or idea is claimed to spread rapidly by unexplained means from one group to all related groups once a critical number of members of one group exhibit the new behavior or acknowledge the new idea.

Abstract

100th Monkey is a much needed breath of fresh air to the dAPP space. It is a revolutionary progressive pot game with 2 different styles of dividends, mini-game block winners, mini-game airdrops, referral link earnings and then large round pots that will progressively get larger as people continue to buy in. The goal of the game is to create a fair opportunity for the players to play unlimited rounds at their leisure and not be limited by huge in-dAPP price increases or time limits. The contract is going to revolutionize how random numbers are created and used in the smart contract space.

It will be made simple and hands free for all to work on. All of the functions of the contract will work without human interaction. It will be like buying your weekly "Mega Millions, Lotto Max, Powerball, China Sports, China Welfare, Lottery Extreme Russia, Euro Millions, etc" but all taken care of on the Ethereum blockchain.

Game introduction

Start of round a random BT supply is created between 10,000-20,000 BT. The BT starts off at 0.002 ETH/BT in MG #1, then increase by 0.0005 Eth/BT/MG.

At the end of a round, the BT will start off the next round MG#1 at previous round MG#1 + 0.0005 ETH/BT. So it continues to scale up until a complete cycle (100 Rounds of 100 MG's). Then starts off back at original BT price. All BT from that RND are stored for CYC POT draw at end of 100 rounds.

Purchase minimum 1 BT/No Max EBI / Excess goes to player's vault during round processing or overspends on a mini-game, since there is a limited supply of BT per MG.

- 25% of all buys go to the MINI-GAME POT.
- 25% of all buys go to the MONKEY POT.
- 10% of all buys go to MINI-GAME DIVIDENDS.
